VOLUME 18

TUESDAY, APRIL 26, 1932 APR 28 1932

NUMBER 27

## G. H. MUSSON TO HEAD NEW SENIOR COUNCIL

There was a mass meeting at Parker Hall last Friday morning at the allotted hour. But the "mass" turned out to be just a few ounces. Outside of the twenty members of the Senior Council, there were about fifteen in the audience.

This meeting we're talking about was called for the purpose of swearing in the new members of the Senior Council. In spite of the extremely small attendance, Dr. Fulton carried through the ceremony, administering the oath to the following men:

Swalley, Bonanza; Bratton, Kappa Alpha; Short, Kappa Sigma; Gross, Mercier; Pinkley, Pi Kappa Alpha; Gilmore, Lambda Chi Alpha; Rodd, Prospector; Simpson, Sigma Nu; Prough, Triangle; and Handly, Hibbits, Hunt, Levy, Messersmith, Musson, Richmond, Rodgers, Rosenbaum, Royer, and Schwartz, all Independents.

The Senior Council is perhaps the most powerful student organization on our campus. It is next in line to the administration in the matters concerning student activities. It depends for its success upon the sincere cooperation of everyone in school. May it be the most successful Council since the first!

Immediately after the installation, officers were elected for next year. G. H. Musson was chosen president, J. C. Messersmith, vice-president, and J. L. Swalley, secretary-treasurer. Under the leadership of these men, the Council will seek to enforce law and order at M. S. M. Maybe something can even be done about encouraging interest in mass meetings. Somehow, it just doesn't seem like thirty-odd men are truly representative of a student body of more than five hundred souls.

What do you think?

MSM

## Steen Next A. S. C. E. President

Last week, on Tuesday evening, the A. S. C. E. held an election of officers for the coming year. Steen was elected president and Ferbrache, secretary-treasurer. Plans were also laid for an inaugural banquet on Tuesday, April 26. This will likewise be a farewell banquet for the graduating members of the society. The banquet is a carrying on of a custom started last year and as it has turned out so well, will be continued.

## Prof. Hanley Attends Zinc Institute Meeting

The School of Mines was represented at the fourteenth annual meeting of the American Zinc Institute by Professor Hanley of the Metallurgy Department. The meeting was held in St. Louis at the Hotel Statler from April 18 to 20 inclusive.

The main theme of the meeting was based upon a "Seal of Quality" program being sponsored by the various zinc companies. This program is attempting to make the country conscious of the need of a good protective coating on galvanized steel. The program is being directed at the farmers, who are the largest consumers of galvanized steel, at the dealers who handle it, and at the manufacturers. All three are enthusiastic about the latest developments.

It has been proved that a coating of one ounce and a quarter or less is not sufficient to prevent rust. In the past the manufacturers have been applying a very light coating of zinc and as a result the steel was often rusted before it reached the final consumer. With the new method of applying a two ounce coating the steel resists rust for forty or fifty years. Some samples were shown which had a three ounce coating and it is claimed that they will resist rust for a century or more. The Institute has decided to make the two ounce coating standard.

Among the papers presented on the subject of heavier coats were "Progress of 'Seal of Quality' Program"

## Miners Place Fifth In Kansas Relays

Last Saturday the Miner mile relay team placed fifth in mile event at the Kansas Relays. The team is composed of Monroe, Irwin, Spotti and Coghill.

The 880 yard relay team was unable to place in their event. This team was composed of Spotti, Coghill, Nickel and Howerton. It was an exceedingly bad day for the meet, with a soft track and rain falling part of the time. Outside of the bad weather conditions the men report a very enjoyable trip. We are extremely glad that the team placed in their event at the relays, where teams from much larger schools participated.

The Miners have a duel meet here next Saturday, April 30, with Drury College of Springfield. We are trusting in the Miners for a decided victory over our old-rivals.

## Independents Elect Officers For Next Year

### HIBBITS NEW PRESIDENT

A meeting of the Independents was held April 18th, for the purpose of electing officers for next year. The following officers were elected:

#### Senior Council

M. G. Handly  
L. A. Hibbits  
T. W. Hunt  
R. R. Levy  
J. C. Messersmith  
G. H. Musson  
R. W. Richmond  
W. M. Rodgers  
C. R. Rosenbaum  
T. W. Royer  
G. N. Schwartz

#### Senior Council Alternates

H. W. Decker  
G. A. Hale  
W. J. Irwin  
R. D. Sandoe

#### St. Pats Board

G. A. Hale.  
L. A. Hibbits was elected president; J. C. Messersmith, vice-president and C. R. Rosenbaum, secretary-treasurer of the Independent organization.

## Sixteen Suspended at M. U. After Probe of St. Pats Shooting

As a result of the kidnaping of Miss Mary Butterfield, the Queen-elect of St. Pats, sixteen students, twelve of them from the engineering school and four lawyers, were indefinitely suspended from the university.

Burnis Frederick, the law student who did the shooting, was not expelled as he withdrew from school because of "ill health". Frank Luckey, the engineer who was most seriously wounded in the shooting scrape, was allowed to continue in school.

The lawyers who partook in the kidnaping coup were severely condemned in a 2500 word report to President Walter Williams. No legal charges were pressed but the seriousness of the misdemeanor was greatly increased because it was a girl who was subjected to the kidnaping. Miss Butterfield was also reprimanded in the report but was not dropped from school. It was claimed that she knew of the kidnaping idea ahead of time and even encouraged the lawyers.

The students were all suspended indefinitely and may only re-enter school with the full approval of the committee that made the report. Continued on page three.

## SWIMMING AND TENNIS TO BE MINOR SPORTS

### AMENDMENTS WILL BE ADDED TO A. A. CONSTITUTION

The amendment to the constitution of the Athletic Association making swimming a major sport was defeated by a large majority in the second balloting last Friday. Thirty-four votes were cast for the amendment to 276 against it.

The proposed amendments making swimming and tennis minor sports carried by a large majority. 328 votes were cast for the second swimming amendment with only 25 against it. The amendment making tennis a minor sport carried with 347 votes for and 9 votes against it.

Much more interest was shown in this poll than in the previous one. According to a communication received from R. H. Weithop, '32, president of the Athletic Association, the amendments received sufficient majority to be adopted to the constitution.

Weithop also stated that according to E. G. Clayton, chairman of the Board of Control of the A. A., there will be a swimming team at M. S. M. as long as the students desire one.

MSM

## Miners Drop Golf and Tennis Matches to Westminster

On Saturday afternoon, April 23, the Miner tennis team was defeated by the racket stars from Westminster. The score was: Westminster, 4; Miners, 2. Schuchmann and Lens were victorious for the Miner squad while Vaughn and Humphreys scored for the Westminster squad. Lens defeated Schoot 6-4; 6-3. Schuchmann lost the first set of his play with Higtarner 5-7 but came back strong to win the match 5-7; 6-2; 6-2. Humphreys won his match with Mertz 6-4; 6-2. Vaughn of Westminster downed Thoroughman, 7-5; 6-1. In the doubles the Westminster squad won everything, Vaughn and Schott defeating Mertz and Lenz 1-6; 7-5 and 12-10. Higtarner and Humphreys won from Thoroughman and Schuchmann 6-3; 8-6. This was the Miners first meet of the year.

### Westminster Golfers Defeat Rolla

Last Friday afternoon, at the same time that the racquetballers from Westminster were competing with the Miner net artists, the Blue Jay linkmen decisively defeated the School of Mines golf

### WE APOLOGIZE

In an article on the A. A. poll appearing in last week's Miner, R. H. Weithop, '32, was written up as R. H. Weithop, '33. We're sorry, Butter. But aside from all that, who's a Palooka?

MSM

### Thru The Transit

The good ship Blurb was to proceed to the east and make reports concerning the prohibition situation there, but due to emergencies which have arisen on the home battlefield it was necessary to recall the mighty sub. It seems that someone is casting aspersions upon the fair name of this sheet. In fact they even went so far as to call this lousy rag a tabloid. Pin and his crew of one on the Blurb are now hurrying to the scene of battle to take charge of all underhand activities. And who could better command a good view of underhand tricks than the occupants of a sub? We are asking you.

We have often heard of hitch hikers who couldn't get a long enough ride but it is seldom that one rides too far. The latter is true of McCrory and Jurvic. McCrory has a bright idea at the circus last week and suggests that they catch a ride to town on the back of a truck. But did they feel embarrassed when the truck didn't stop and let them off until it got to St. James at twelve that night. And from one who was unlucky enough to listen to an idea of McCrory's, that is a heckava town to be in after curfew.

The following rather odd description of a cow appeared on a paper of a schoolboy!

"The cow is a mammal and tamed; she has six sides; right, left, top, bottom, front, and back. At the back end, there is a tail from which hangs a plume with which to drive off flies so they can't fall in the milk. The head has for its aim to have horns and that the mouth can be put there. The horns are there for horning and the mouth is for chewing a cud.

Under the cow hangs the milk and it is arranged to be milked. When people milk, the milk comes and there is never an end to the

reserve. I have never learned how she makes more and more milk.

The cow has a good odor. One can smell her from war away; it is for this reason that there is fresh air out in the country. The mister cow is called a beef, he is not a mammal."

With an off afternoon the other day we decided to take a little journey about the joint known to outsiders as Rolla. As we go steaming down the highway on our swell fifth hand job we encountered a neat little girl walking all alone. Just when we were thinking how lonesome we were fate throws this across our path (as we were about to run off the road at this time). We glide silently up with a great screeching of brakes and anchor alongside. It is at this point that the college technique comes into play so we break the ice with a new gag just off the press:

"Ain't we met before sommers?"

And with that she comes back with a snappy, "Naw it musta bin two other people."

Well, after hearing that statement we decide to go her way s we always did like girls which make snappy replies. As she climbs into the limosine we give the old crank a twist and breeze away at the breathtaking speed of two miles per. I immediately see that it is a real lady riding with me by the way she lolls back and assumes the pose one sees on the fronts of those who ride Park Avenue. We decide to launch the conversation:

Us: Swell day.

She: If it don't rain.

Us: Do you play poker?

She: I had a horse once.

After continuing along this line for five miles and ten thousand bumps we begin to realize that she is really a smart kid. At this instant the car arrives at a lane and automatically turns in. Then—slap!

Oh, and was our face red!

And on another idle day thoughts occurred to us:

Why don't someone wash the windows in the Miner office—that Elliotts fo Westminster played the best brand of golf seen here in many a moon—the Senior Council members being sworn in—that the latest rumor is that the freshmen lose their suspenders this Saturday—the Tennis Club is really working hard to fix the courts—and doing a swell job of it—that the Miners are taking to golf in huge numbers—its just a Spring from Winter to Summer—and it seems to be a short one this time—the St. Pat Board preparing to toss a free dance—the Triangles playing horseshoes—a grand old game and one that should be included in the Intramurals—the Prospectors still winning ball games—it there no end to their winning streak?—the prize for the oddest sounding car in town should be given to Marxer—and so off to idle among the dandelions on the golf course—

MSM

If a man can't argue, he'll quarrel.

### STEAM CANNON USED TO SEPARATE ORES

Washington Engineer Invents  
Instrument for Ore Crushing

Minneapolis, Minn., April 16.—A cannon in which steam provides explosives force, was exhibited at the University of Minnesota today as the chief implement in a new process of separating valuable ores from worthless rocks.

It is the invention of R. S. Dean of Washington, Chief Engineer of the Metallurgical Division of the United States Bureau of Mines. It has been perfected by John Gross, a bureau metallurgist, who predicted the process would revolutionize methods of separating lead, iron, zinc and other metals from substances with which they usually are found.

As the first step, ore-bearing rocks are immersed in water, which soaks into pores and cracks. They are then run into the cannon, which resembles a wheelless locomotive. Water is added and boiled to provide a pressure of 150 pounds.

Meanwhile water in the pores has turned to steam and at the maximum pressure a lever, the cannon's trigger, is pulled. The steam expands with a roar, the ore is hurled into a container and is reduced to pulverized form, ready for smelting.

Gross said the process would provide a greatly increased rate of recovery of valuable metals compared with processes now common in the industry, and would open the way to utilization of lower grade ores than have been of value commercially.

Dean is a graduate of the Missouri School of Mines; B. S., '15, M. S., '16, Met. E., '23.

MSM

### PI K. A. DANCE

The Pi Kappa Alpha fraternity had their spring formal at their house Saturday night, April 23, 1932. The men in their white flannels and dark coats, and their dates in evening dress made the party a very attractive one.

Many out-of-town guests were present and they all agreed that the members of Alpha Kappa knew how to throw a real dance. Those present reported it as one of the season's most enjoyable evenings.

The music was most capably furnished by the Varsity orchestra under the direction of Babe Clemmons. Those chaperoning the party were: Lieut. and Mrs. Hardin, Prof. and Mrs. Carlton, Mr. and Mrs. Williams, Mr. and Mrs. Smith and Mr. James Cullison.

# MISSOURI SCHOOL OF MINES CIVIL ENGINEERING STUDENT WINS FOREIGN SCHOLARSHIP.

Mr. Elmer John Sperling, B. S.,  
M. S.

Mr. Elmer John Sperling of Cape Girardeau, Mo., in a national contest received word a few days ago that he has been awarded for the academic year 1932-1933, the American German Student Exchange Scholarship known in Germany as the Deutscher Akademische Austauschdienst Mitgliedschaft. Mr. Sperling's special field of study abroad will be Hydraulic Engineering. He contemplates studying under such noted engineers as Rehbock, Prandtl, Thoma, Winkel, Imhoff and others famous in the fields of hydraulic engineering.

Mr. Sperling is the son of Mr. and Mrs. William J. Sperling of Cape Girardeau, Mo. His father is

well known as a monument dealer in southeast Missouri, being the owner of the Cape Girardeau Marble and Granite Works. Mr. Sperling's grandparents came from Germany.

Mr. Sperling attended the Public Schools of Cape Girardeau; the southeast Missouri State Teachers' College; Washington University at St. Louis; and the Missouri School of Mines and Metallurgy at Rolla, Mo. At the Missouri School of Mines he received the degrees of Bachelor of Science in Civil Engineering and Master of Science in Civil Engineering, Majoring in Hydraulic Engineering. During his undergraduate course at Rolla, he has held teaching assistantship positions thus earning most of his own way. While in the Graduate School, he has been Graduate Assistant in charge of the hydraulic laboratory and also gave lectures in hydraulic similitude and dimen-

sional analysis.

## AT THE THEATER

## BROKEN LULLABY

This picture is the film version of the play "The Man I Killed" by Maurice Rostand. Lionel Barrymore picks up the picture and walks away with it. Phillips Holmes isn't far behind him; and Nancy Carroll does some wonderful acting. "Broken Lullaby" is a daring picture of the aftermath of the war taken from a novel angle. Very sincere.

## CHARLEY CHAN'S CHANCE

Another great mystery story starring that infallible oriental mastermind, Charley Chan (Warner Oland). The former chief of Scotland Yard is found dead in the office of Barry Kirk (Ralph Morgan). The doctor summoned there, pronounces the death as the result of heart failure. But Charley Chan's keen eyes pick up a few clues, and insists that the man was murdered. The police are lost and without a bit of evidence. Then Chan's shrewd eyes narrow down to a fugitive from justice, a crafty oriental, a pent-house millionaire, and two beautiful women. And he gets the right one.

## STRICTLY DISHONORABLE

Starring Paul Lukas, Sidney Fox and Lewis Stone, this picture is a very interesting comedy. The story concerns an innocent Southern girl and her pugnacious fiancé, who leaves in jealous anger when she casts admiring glances at an Italian opera singer whom she meets in a speakeasy. The sudden romance that blossoms between this great lover and the deserted Southern beauty is told with daring and yet with utmost delicacy.

## ITS TOUGH TO BE FAMOUS

Douglas Fairbanks, Jr., again has a good picture. As Scotty McClenahan, a young naval officer trapped with his men in a sunken submarine, he saves his men by shooting them out the torpedo tube, but is unable to save himself. Just as he resigns himself to his fate, he is saved by divers. Immediately he is a national hero. To escape this, he runs away to Janet (Mary Brian), of whom he is very fond, falls asleep in her arms and is finally aroused to go home. As he leaves, he is caught by a reporter—with Janet standing in the doorway in her nightgown and wrapper. Scotty hastily announces their engagement. They are married, but bset by reporters at every turn. They quarrel and she returns home. But this is getting too long—you'll have to see this picture.

complimented on its exchange of students; engineers have come to Rolla from nearly all of the nations of the earth; its graduates are to be found at the antipodes and everywhere between here and there. The school's far-reaching reputation is known as is no other mining college. In past years other graduates of the school have studied abroad; and it is hoped that each year some of its graduates will avail themselves of the opportunity of foreign study. The school is proud of its scholarship winners too; they speak for the quality of its engineering training in comparison with the other engineering institutions. At the present time the School of Mines offers graduate courses in hydraulic engineering not offered elsewhere in the United States. In the other branches of civil engineering the department is equally specialized.

During the summer of 1931, Mr. Sperling was a member of the technical staff of the U. S. Waterways Experiment Station of the Mississippi River Commission at Vicksburg, Mississippi. At Vicksburg as well as at Rolla, Mr. Sperling has been under the leadership of engineers who studied hydraulics abroad as well as in American universities. Dr. Herbert D. Vogel, Director of the Government Laboratory was holder of the Austauschdienst Scholarship in 1928-29; and Dr. Clarence E. Bardsley, Professor of Hydraulic Engineering at the School of Mines was the recipient of the John R. Freeman Scholarship of the American Society of Civil Engineers for the study of hydraulic engineering and hydraulic laboratories in Europe during the same period.

Mr. Sperling will sail for Germany about October 1, 1932, to enter the winter semester of the Friederician Technische Hochschule at Karlsruhe in Baden. This beautiful city is four miles from the Rhein River, right at the edge

### Prof. Hanley Attends Zinc Institute Meeting

Continued from page one.

gram; Technical Studies of Zinc-Coated Materials; Telling the World About Heavy-Coated Sheets. Papers were also presented dealing with the attitude of the farmer on this subject and on better roofing methods for farm houses and buildings.

One of the new processes discussed was the Waelb Process. It is a method whereby zinc may be recovered from the residue. Often the residue contains as much as fifteen percent zinc and this may be almost wholly recovered. The process is not economically efficient for small plants but it may be used very profitably for large plants. It may also be used by several small plants which are close together. In this method the residue is roasted in a large kiln with coal and the zinc is collected as zinc oxide.

Another step forward in the zinc industry was shown by a paper dealing with the progress in the natural gas reduction of zinc. This process is still in its experimental stages but if successful, will do away with the use of carbon dioxide in the reduction of the metal.

According to the reports received from Prof. Hanley, the meeting was very successful. The attendance was smaller than usual but those who were there showed great enthusiasm.

Surely atoms and molecules shall follow me all the days of my life; and I will dwell in the chem lab forever.

(Necessarily) Anonymous.

Chicago—(IP)—One of the most drastic rule changes ever made in collegiate basketball was voted here last week when the National Association of Basketball Coaches in an effort to speed up the game abolished stalling.

This was accomplished by ruling that any team in possession of the ball in the back court must

cross the center of the playing floor toward its target within ten seconds. Penalty for violation of the rule is loss of the ball at the nearest sideline.

Dr. Forrest Allen of the University of Kansas pronounced the new rule the most revolutionary change in the game since the dribble law of 1906.

The rule was suggested by Coach Harold Olsen of Ohio State University who later was elected president of the association. Four

vice-presidents elected were Roy Mondroff of Georgia Tech; Howard Ortner, Cornell University; W. C. Longborg, Northwestern, and H. C. Beresford, University of Colorado.

### INDEPENDENT A LEAD INTRAMURAL BASE- BALL LEAGUE

#### PROSPECTORS DROP TO SECOND PLACE

##### Prospectors In Second Place

The past week saw some upsets in the intramural baseball league. As a result the Ind. A's are now holding first place undisputedly, having six wins and no losses. The league leading Prospectors, due to a tough break, lost a game to the Triangles. The Prospectors were without the pitching services of Malik, their star hurler, who has an injured hand.

The results of last week's games are as follows:

In the Monday game, the Ind. A's had little trouble in defeating the Merciers, 9 to 2. Breuer held the hard-hitting Merciers to three scattered hits, while his teammates were driving across nine runs. Batteries: Ind. A—Breuer and Heitzman; Merciers—Carr and Haffner.

In the game on Wednesday, the Ind. A's were victorious over the Kappa Sig team. The score was 11 to 2. Batteries: Ind. A—Kirchoff and Koch; Kappa Sigma—Parker and Musick.

On Thursday the Lambda Chi team won from the Bonanzas, 10 to 5. Batteries: Lambda Chi—Fort and Macke; Bonanza—Tomlinson and Parker.

Friday's game saw a decided upset, with the Prospectors losing to the Triangles. Groom, who took over the pitching duties for the Prospectors, was somewhat unsteady in spots, and the Triangles came out in the long end of a 9-7 score.

The Pi K. A. team won from the Kappa Sigma team on Saturday afternoon. The score was 10 to 8. The Kappa Sigs, going into the last inning trailing by a score of 10 to 2, started a rally which very nearly tied up the score. However, they were able to push across only six runs, which was not enough to overcome the Pi K. A. lead. Batteries: Pi Kappa Alpha—Taylor and Crippen; Kappa Sigma—Galloway, Parker and Wildberger.

In the games played on Sunday, the Ind. B's won easily over the Triangles, 13 to 2. Stanton, Ind. B pitcher, held the Triangles to four hits. Batteries: Ind. B—Stanton and Szezuka; Triangles—Williams and Hoeman.

The Bonanzas had little difficulty in defeating the Sigma Nus, 10 to 3. Batteries: Bonanza—O'Hearn and Parker; Sigma Nu—Gibson and McCreight.

The Ind. A's won a close game from the strong Lambda Chi team, 6 to 5. The Ind. As had six hits, while the Lambda Chi team had five safe blows. Batteries: Ind. A—Breuer and Koch; Lambda Chi—Fort and Macke.

The Kappa Alpha team failed to show up at a scheduled game with the Merciers, so the latter win a game by forfeit.

#### Standing of the teams:

	W	L	%
Ind. A.....	6	0	1000
Prospectors.....	4	1	800
Lambda Chi.....	3	3	600
Ind. B.....	3	2	600
Pi K. A.....	4	3	571

#### LAMBDA CHI DANCE

The Lambda Chi Alpha fraternity gave a farewell dance at their chapter house Friday night, April 22, 1932. The dance was their last dance of the year and every effort was expended to make it a real party. The dates were very charming and added greatly to the success of the "Hop."

An exceedingly large crowd attended including guests, members and chaperons, and all complimented the fraternity on such an excellent dance.

Babe Clemmons and his Varsity orchestra furnished a very fine program of the latest dance hits. The party had as chaperons: Mr. and Mrs. E. D. Williams, Mr. and Mrs. De Vere Joslin, Mr. and Mrs.

### Miners Drop Golf-Tennis Match to Westminster

(Concluded From Page One)

aggregation 9-3. The Westminster team was led by Alf Elliotts, who played in the No. 1 position. The Miners No. 1 man was Gross and Matsik played Backer of Westminster to compete the foursome.

The greater part of the gallery trailed the No. 1 foursome. They were attracted by Elliotts, who was highest ranking amateur in last year's St. Louis Open Tournament. The large following was not disappointed as Elliotts shot a brilliant game, defeating Gross 5 up and 4 with a 74 for the eighteen holes.

In the other matches, Backer defeated Matsik, Forrills downed

### Theta Tau Luncheon

At the last meeting of Theta Tau, held in the club room, National Affairs were discussed. President Gross spoke of this chapter being recognized by the national officers as one of the leading chapters of the country. The weekly luncheon was held, as usual, in the College Inn of the Hotel Edwin Long. Nothing of importance transpired except the enjoyment of a good meal by all those present.
